About this Manual

This Manual is applicable to Network Camera.

The Manual includes instructions for using and managing the product. Pictures, charts, images and all other information hereinafter are for description and explanation only. The information contained in the Manual is subject to change, without notice, due to firmware updates or other reasons. Please find the latest version in the company website www.vezcocctv.com

Please use this user manual under the guidance of professionals.

Legal Disclaimer

REGARDING TO THE PRODUCT WITH INTERNET ACCESS, THE USE OF PRODUCT SHALL BE WHOLLY AT YOUR OWN RISKS. OUR COMPANY SHALL NOT TAKE ANY RESPONSIBILITES FOR ABNORMAL OPERATION, PRIVACY LEAKAGE OR OTHER DAMAGES RESULTING FROM CYBER ATTACK, HACKER ATTACK, VIRUS INSPECTION, OR OTHER INTERNET SECURITY RISKS; HOWEVER, OUR COMPANY WILL PROVIDE TIMELY TECHNICAL SUPPORT IF REQUIRED.

SURVEILLANCE LAWS VARY BY JURISDICTION. PLEASE CHECK ALL RELEVANT LAWS IN YOUR JURISDICTION BEFORE USING THIS PRODUCT IN ORDER TO ENSURE THAT YOUR USE CONFORMS THE APPLICABLE LAW. OUR COMPANY SHALL NOT BE LIABLE IN THE EVENT THAT THIS PRODUCT IS USED WITH ILLEGITIMATE PURPOSES.

IN THE EVENT OF ANY CONFLICTS BETWEEN THIS MANUAL AND THE APPLICABLE LAW, THE LATER PREVAILS.

Regulatory Information

FCC Information
Please take attention that changes or modification not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

**FCC compliance:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

— Reorient or relocate the receiving antenna.
— Increase the separation between the equipment and receiver.
— Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
— Consult the dealer or an experienced radio/TV technician for help.

**FCC Conditions**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.
EU Conformity Statement

This product and - if applicable - the supplied accessories too are marked with "CE" and comply therefore with the applicable harmonized European standards listed under the EMC Directive 2014/30/EU, the RoHS Directive 2011/65/EU.

2012/19/EU (WEEE directive): Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. For more information see: www.recyclethis.info

2006/66/EC (battery directive): This product contains a battery that cannot be disposed of as unsorted municipal waste in the European Union. See the product documentation for specific battery information. The battery is marked with this symbol, which may include lettering to indicate cadmium (Cd), lead (Pb), or mercury (Hg). For proper recycling, return the battery to your supplier or to a designated collection point. For more information see: www.recyclethis.info

Industry Canada ICES-003 Compliance

This device meets the CAN ICES-3 (B)/NMB-3(B) standards requirements.
Network Turret Camera · Quick Start Guide

Safety Instruction
These instructions are intended to ensure that user can use the product correctly to avoid danger or property loss.

The precaution measure is divided into “Warnings” and “Cautions”

**Warnings**: Serious injury or death may occur if any of the warnings are neglected.

**Cautions**: Injury or equipment damage may occur if any of the cautions are neglected.

<table>
<thead>
<tr>
<th>Warnings</th>
<th>Cautions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Follow these safeguards to prevent serious injury or death.</td>
<td>Follow these precautions to prevent potential injury or material damage.</td>
</tr>
</tbody>
</table>

**Warnings**

- Proper configuration of all passwords and other security settings is the responsibility of the installer and/or end-user.
- In the use of the product, you must be in strict compliance with the electrical safety regulations of the nation and region. Please refer to technical specifications for detailed information.
- Input voltage should meet both the SELV (Safety Extra Low Voltage) and the Limited Power Source with 12 VDC according to the IEC60950-1 standard. Please refer to technical specifications for detailed information.
- Do not connect several devices to one power adapter as adapter overload may cause over-heating or a fire hazard.

- Please make sure that the plug is firmly connected to the power socket. When the product is mounted on wall or ceiling, the device shall be firmly fixed.

- If smoke, odor or noise rise from the device, turn off the power at once and unplug the power cable, and then please contact the service center.

Cautions

- Make sure the power supply voltage is correct before using the camera.

- Do not drop the camera or subject it to physical shock.

- Do not touch sensor modules with fingers. If cleaning is necessary, use clean cloth with a bit of ethanol and wipe it gently. If the camera will not be used for an extended period, please replace the lens cap to protect the sensor from dirt.

- Do not aim the camera at the sun or extra bright places. Blooming or smearing may occur otherwise (which is not a malfunction), and affect the endurance of sensor at the same time.

- The sensor may be burned out by a laser beam, so when any laser equipment is in using, make sure that the surface of sensor will not be exposed to the laser beam.

- Do not place the camera in extremely hot, cold (the operating temperature shall be -30°C ~+60°C, or -40°C ~+60°C if the
camera model has an “H” in its suffix), dusty or damp locations, and do not expose it to high electromagnetic radiation.

- To avoid heat accumulation, good ventilation is required for operating environment.
- Keep the camera away from liquid while in use.
- While in delivery, the camera shall be packed in its original packing, or packing of the same texture.
- Regular part replacement: a few parts (e.g. electrolytic capacitor) of the equipment shall be replaced regularly according to their average enduring time. The average time varies because of differences between operating environment and using history, so regular checking is recommended for all the users. Please contact with your dealer for more details.
- Improper use or replacement of the battery may result in hazard of explosion. Replace with the same or equivalent type only. Dispose of used batteries according to the instructions provided by the battery manufacturer.
- If the product does not work properly, please contact your dealer or the nearest service center. Never attempt to disassemble the camera yourself. (We shall not assume any responsibility for problems caused by unauthorized repair or maintenance.)

</table>

**Notes:**

- For this type IV camera, the layout of memory card slot and reset button may be different from model to model.

- Press Reset button about 10s when the camera is power on or rebooting to restore the default settings, including the user name, password, IP address, port No., etc.
2 Installation

Before you start:

- Make sure the device in the package is in good condition and all the assembly parts are included.
- The standard power supply is 12 VDC, please make sure your power supply matches with your camera.
- Make sure all the related equipment is power-off during the installation.
- Check the specification of the products for the installation environment.
- Make sure that the wall is strong enough to withstand four times the weight of the camera and the bracket.

For the camera that supports IR, you are required to pay attention to the following precautions to prevent IR reflection:

- Make sure that there is no reflective surface too close to the camera lens. The IR light from the camera may reflect back into the lens causing reflection.

2.1 Ceiling Mounting

2.1.1 Type I

Steps:

1. Disassemble the camera.

   1). Loosen the lock screw on the mounting base and take it off from the camera.
2). Rotate the trim ring anticlockwise to take it off from the camera.

3). Separate the camera and the enclosure.

Figure 2-1 Disassemble the Camera

2. Drill the screw holes and the cable hole on the ceiling according to the drill template.

Figure 2-2 The Drill Template
There are two cable outlet methods. One is to route the cables through the cable hole, and the other is to route the cables through the side outlet shown below.

![Side Outlet](image)

**Figure 2-3 Side Outlet**

Three side outlets on the enclosure are selectable, which makes routing the cables easier instead of drilling a cable hole on the ceiling. Use a plier to remove the plastic and route the cables through the hole.

3. Fix the mounting base to the ceiling with the supplied expansion screws.
Figure 2-4 Secure the Mounting to the Ceiling

4. Connect the corresponding power/network cable and then install the camera to the mounting base with the supplied screws. Rotate the camera to secure it.

Figure 2-5 Secure the Camera to the Mounting Base

5. Adjust the Lens.

1). Loosen the lock screw.
2). Rotate the enclosure to adjust the pan angle; rotate the camera to adjust the tilt angle.

3). Tighten the lock screw to fix the optimum surveillance angle.

6. Attach the trim ring to the camera and rotate the trim ring clockwise to get it secured.
2.1.2 Type II

Steps:
1. Disassemble the camera.
   
   1). Rotate the enclosure anticlockwise to take it off from the camera.
   
   2). Separate the camera, the mounting base, and the trim ring.
2. Drill the screw holes and the cable hole on the ceiling according to the drill template.

There are two cable outlet methods. One is to route the cables through the cable hole, and the other is to route the cables through the side outlet shown below.
Three side outlets on the enclosure are selectable, which makes routing the cables easier instead of drilling a cable hole on the ceiling. Use a plier to remove the plastic and route the cables through the hole.

3. Fix the mounting base to the ceiling with the supplied expansion screws.
4. Connect the corresponding power/network cable.

5. Install the camera along with the enclosure to the mounting base by anticlockwise rotating the camera.

6. Rotate the enclosure to adjust the pan angle; rotate the camera to adjust the tilt angle.

7. Attach the trim ring to the camera and rotate the trim ring clockwise to get it secured.

Figure 2-13 Adjust the Lens

Figure 2-14 Install the Trim Ring
2.1.3 Type III

Steps:

1. Disassemble the camera.

   1). Rotate the trim ring anticlockwise to take it off from the camera.
   
   2). Rotate the mounting base anticlockwise to take it off from the camera.
   
   3). Separate the camera and the enclosure.

![Disassemble the Camera](image)

Figure 2-15 Disassemble the Camera

2. Install the memory card.

   1). Find the Micro SD/RST cover on the side of the camera.

![Micro SD/RST Cover](image)

Figure 2-16 Micro SD/RST Cover
2). Take off the cover and insert the microSD card into the card slot.

![microSD Card](image)

Figure 2-17 Memory Card Slot

3). Place the cover back.

3. Stick the drill template on the installation place and drill the screw holes and the cable hole on the ceiling according to the drill template.

![Drill Template](image)

Figure 2-18 The Drill Template

4. Fix the mounting base to the ceiling with two supplied expansion screws.
5. Connect the corresponding power/network cable. Refer to the section 2.3 for the water-proof accessory installation if the camera is installed in the outdoor.

6. Install the camera along with the enclosure to the mounting base by anticlockwise rotating the camera.

7. Rotate the enclosure to adjust the pan angle; rotate the camera to adjust the tilt angle.
Figure 2-21 Adjust the Lens

8. Attach the trim ring to the camera and rotate the trim ring clockwise to get it secured.

Figure 2-22 Install the Trim Ring

2.1.4 Type IV

Steps:

1. Disassemble the camera.

1). Rotate the trim ring anticlockwise to take it off from the camera.
2). Loosen the fixing screw. Take the mounting base off from the camera and the enclosure.

3). Separate the camera and the enclosure.

Figure 2-23 Disassemble the Camera

2. Install memory card.

1). Unscrew the memory card slot cover.

2). Insert the memory card.

3). (Optional) to unmount the memory card, push to get it ejected.

Figure 2-24 Install Memory Card
4. Screw the memory card slot cover back.

3. Paste the drill template to desired mounting place.

4. Drill the screw holes (for expansion screws) and the cable hole on the ceiling according to the drill template.

*Note:*

If the camera is installed to a wooden wall, use self-tapping screws instead of expansion screws.

![Drill Template](image)

Figure 2-25 Drill Template

5. Fix the mounting base to the ceiling with two supplied screws.
6. Connect the corresponding power/network cable. Refer to the section 2.3 for the water-proof accessory installation if the camera is installed in the outdoor.

7. Install the camera along with the enclosure to the mounting base.

8. Adjust the surveillance angle of the camera. Secure the fixing screw after adjustment.
9. Attach the trim ring to the camera and rotate the trim ring clockwise to get it secured.

2.2 Mounting with Brackets

This camera series supports mounting with wall mounting bracket and pendant mounting bracket. We take Type IV camera as the demonstration example.
2.2.1 Wall Mounting

The wall mount is not included in the package. You need to prepare one, if you adopt this mounting type.

Steps:

1. Mark the screw holes on desired mounting place.

![DIMENSION OF DEMONSTRATED WALL MOUNTING BRACKET]

2. Drill four screw holes with a $\Phi 10$ mm drill.

3. Route the cables and fix the bracket with four M6 expansion bolts.

4. Disassemble the camera.
   Refer to step 1 in ceiling mounting of each camera type.

5. Fix the mounting base to the cap of wall mount with 3 supplied self-tapping screws.
6. Connect the corresponding power/network cable. Refer to the section 2.3 for the water-proof accessory installation if the camera is installed in the outdoor.

7. Install the camera and the enclosure to the mounting base, adjust the surveillance angle, and fix the trim ring. Refer to corresponding steps in ceiling mounting of each camera type.
2.2.2 Pendant Mounting

The pendant mounting bracket is not included in the package. You need to prepare one in advance, if you adopt this mounting type.

**Steps:**

1. Mark the screw holes on desired mounting place.
2. Drill three screw holes for expansion bolts.
3. Route the cables and fix the pendant mounting bracket to ceiling.

![Cables Diagram](image)

Figure 2-33 Fix Pendant Mount

4. Disassemble the camera.
   Refer to step 1 in ceiling mounting of each camera type.

5. Fix the mounting base to the cap of the pendant mounting bracket with 3 supplied self-tapping screws.
6. Screw the cap to the pendant mount.

7. Connect the corresponding power/network cable. Refer to the section 2.3 for the water-proof accessory installation if the camera is installed in the outdoor.
8. Install the camera and the enclosure to the mounting base, adjust the surveillance angle, and fix the trim ring. Refer to corresponding steps in ceiling mounting of each camera type.

Figure 2-36 Pendant Mounting

2.3 Network Cable Water-proof Accessory Installation

*Purpose:*

If the camera is installed outdoor, you can adapt the water-proof accessory for the network cable after the camera is secured on the installation surface.
Table 2-1 Components

<table>
<thead>
<tr>
<th>No.</th>
<th>Components</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Camera’s Network Interface Socket</td>

<td>Network Cable from Router/Switch</td>
</tr>
</tbody>
</table>

**Steps:**

1. Feed the plugless network cable ⑦ through the lock nut ⑥, waterproof rubber gasket ⑤ (rubber gasket inset ridge must face waterproof endcap), and the water-proof endcap ④ in order.

2. Crimp an RJ-45 network plug ③ onto the end of the cable, taking care to insert the twisted pairs of wires in correct order.
3. Place the O-type gasket ② onto the end of the camera’s network interface socket ①.

4. Insert the network plug ③ into the camera’s network interface socket ①.

5. Insert the water-proof rubber gasket ⑤ into the waterproof endcap ④, and secure lock nut ⑥ with the water-proof endcap ④.

6. Align the snap on the water-proof endcap ④ with the notch on the camera’s network interface socket ①, and then secure the water-proof endcap ④ to the camera’s network interface socket ① to finish installation.

Figure 2-38 Water-proof Accessory Installation
3 Setting the Network Camera over the LAN

Note:

You shall acknowledge that the use of the product with Internet access might be under network security risks. For avoidance of any network attacks and information leakage, please strengthen your own protection.

If the product does not work properly, contact your dealer or the nearest service center for help.

3.1 Wiring

Connect the camera to network according to the following figures.

Figure 3-1 Connecting Directly

Figure 3-2 Connecting via a Switch or a Router
3.2 Activating the Camera

You are required to activate the camera first by setting a strong password for it before you can use the camera.

Activation via Web Browser, Activation via SADP, and Activation via Client Software are all supported. We will take activation via SADP software and Activation via Web Browser as examples to introduce the camera activation.

*Note:*

Refer to the User Manual of Network Camera for Activation via Client Software.

3.2.1 Activation via Web Browser

*Steps:*

1. Power on the camera. Connect the camera to your computer or the switch/router which your computer connects to.

2. Input the IP address into the address bar of the web browser, and press Enter to enter the activation interface.

*Notes:*

- The default IP address of the camera is 192.168.1.64.
- The computer and the camera should belong to the same subnet.
- For the camera enables the DHCP by default, you need to use the SADP software to search the IP address.
3. Create a password and input the password into the password field.

**STRONG PASSWORD RECOMMENDED**— We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

4. Confirm the password.
5. Click **OK** to save the password and enter the live view interface.

### 3.2.2 Activation via SADP Software

SADP software is used for detecting the online device, activating the camera, and resetting the password.
Get the SADP software from the supplied disk or the official website, and install the SADP according to the prompts. Follow the steps to activate the camera, please refer to the User Manual of Network Camera for other two activation methods.

**Steps:**

1. Run the SADP software to search the online devices.

2. Check the device status from the device list, and select the inactive device.

![Figure 3-4 SADP Interface](image)

**Note:**

The SADP software supports activating the camera in batch. Refer to the user manual of SADP software for details.

3. Create and input the new password in the password field, and confirm the password.
STRONG PASSWORD RECOMMENDED—We highly recommend you create a strong password of your own choosing (using a minimum of 8 characters, including upper case letters, lower case letters, numbers, and special characters) in order to increase the security of your product. And we recommend you reset your password regularly, especially in the high security system, resetting the password monthly or weekly can better protect your product.

Note:

You can enable the GUARDING VISION service for the device during activation. Refer to Chapter 5.1 for detailed information.

4. Click Activate to start activation.

You can check whether the activation is completed on the popup window. If activation failed, make sure that the password meets the requirement and try again.

3.3 Modifying the IP Address

Purpose:

To view and configure the camera via LAN (Local Area Network), you need to connect the network camera in the same subnet with your PC.

Use the SADP software or client software to search and change the IP address of the device. We take modifying the IP Address via SADP software as an example to introduce the IP address modification.

For IP address modification via client software, refer to the user manual of client software.
Steps:

1. Run the SADP software.
2. Select an activate device.
3. Change the device IP address to the same subnet with your computer by either modifying the IP address manually or checking the checkbox of Enable DHCP.

![Figure 3-5 Modify the IP Address](image)
Note:

You can enable the GUARDING VISION service for the device during activation. Refer to Chapter 5.1 for detailed information.

4. Input the admin password and click **Modify** to activate your IP address modification.

The batch IP address modification is supported by the SADP. Please refer to the User Manual of SADP for details.
4 Accessing via Web Browser

**System Requirement:**

Operating System: Microsoft Windows XP SP1 and above version  
CPU: 2.0 GHz or higher  
RAM: 1G or higher  
Display: 1024×768 resolution or higher  
Web Browser: Internet Explorer 8.0 and above version, Apple Safari 5.0.2 and above version, Mozilla Firefox 5.0 and above version and Google Chrome 18 and above version  

**Steps:**

1. Open the web browser.  
2. In the browser address bar, input the IP address of the network camera, and press the Enter key to enter the login interface.  
   
   **Note:**  
   - The default IP address is 192.168.1.64. You are recommended to change the IP address to the same subnet with your computer.  
3. Input the user name and password.  
   
   The admin user should configure the device accounts and user/operator permissions properly. Delete the unnecessary accounts and user/operator permissions.  
   
   **Note:**  
   - The device IP address gets locked if the admin user performs 7 failed password attempts (5 attempts for the user/operator).
4. Click **Login**.

![Login Interface](image)

*Figure 4-1 Login Interface*

5. Install the plug-in before viewing the live video and managing the camera. Please follow the installation prompts to install the plug-in.

*Note:*

You may have to close the web browser to finish the installation of the plug-in.

![Download Plug-in](image)

*Figure 4-2 Download Plug-in*

6. Reopen the web browser after the installation of the plug-in and repeat steps 2 to 4 to login.

*Note:*

For detailed instructions of further configuration, please refer to the user manual of network camera.
5 Operating via GUARDING VISION App

Purpose:
GUARDING VISION is an application for mobile devices. With the App, you can view live image of the camera, receive alarm notification and so on.

Note:
GUARDING VISION service is not supported by certain camera models.

5.1 Enable GUARDING VISION Service on Camera

Purpose:
GUARDING VISION service should be enabled on your camera before using the service.

You can enable the service through SADP software or web browser.

5.1.1 Enable GUARDING VISION Service via SADP Software

Steps:
1. Check the checkbox of Enable GUARDING VISION on:
   1). "Activate the Device" page during camera activation, refer to Chapter 3.2.2.
   2). Or "Modify Network Parameters" page during modifying IP address, refer to Chapter 3.3.
2. Create a verification code or change the verification code.
Figure 5-1 Verification Code Setting (SADP)

**Note:**

The verification code is required when you add the camera to GUARDING VISION app.

3. Click and read "Terms of Service" and "Privacy Policy".

4. Confirm the settings.

**5.1.2 Enable GUARDING VISION Service via Web Browser**

**Before you start:**
You need to activate the camera before enabling the service. Refer to Chapter 3.2.
**Steps:**

1. Access the camera through web browser. Refer to Chapter 4.

2. Enter platform access configuration interface: Configuration > Network > Advanced Settings > Platform Access

![Platform Access Configuration (Web)](image)

3. Select Platform Access Mode as **GUARDING VISION**.

4. Check the checkbox of **Enable**.

5. Click and read "Terms of Service" and "Privacy Policy" in pop-up window.

6. Create a verification code or change the verification code for the camera.

   **Note:**

   The verification code is required when you add the camera to GUARDING VISION app.

7. Save the settings.
5.2 GUARDING VISION Setup

Steps:

1. Download and install the GUARDING VISION app by searching “GUARDING VISION” in App Store or Google Play™.
2. Launch the app and register for a GUARDING VISION user account.
3. Log in GUARDING VISION app after registration.

5.3 Adding Camera to GUARDING VISION

Before you start:

You need to enable the GUARDING VISION service on camera before adding it to your GUARDING VISION account. Refer to Chapter 5.1.

Steps:

1. Use a network cable to connect the camera with a router if the camera does not support Wi-Fi.

![Figure 5-3 Connect a Router](image)

Note:

After the camera connects to the network, please wait one minute before any operation on the camera using GUARDING VISION app.

2. In the GUARDING VISION app, tap “+” on the upper-right corner and then scan the QR code of the camera to add the camera.
You can find the QR code on the camera or on the cover of the Quick Start Guide of the camera in the package.

![QR Code Example](image)

Figure 5-4 Scan QR Code

**Note:**

If the QR code is missing or too blur to be recognized, you can also add the camera by tapping the icon and inputting the camera's serial number.

3. Input the verification code of your camera.

**Note:**

- The required verification code is the code you create or change when you enabling GUARDING VISION service on camera.

- If you forget the verification code, you can check the current verification code on Platform Access configuration page via web browser.

4. Follow the prompts to set the network connection and add the camera to your GUARDING VISION account.

**Note:**

For detailed information, refer to the user manual of the GUARDING VISION app.
5.4 Initializing the Memory Card

**Steps:**

Check the memory card status by tapping on the Storage Status in the Device Settings interface.

If the memory card status displays as Uninitialized, tap to initialize it. The status will then change to Normal. You can then start recording any event triggered video in the camera such as motion detection.
